

Postman Request Collection Documentation

This document provides a detailed guide on how to use the Postman request collection to test the endpoints of the Pharmacy Management System API.

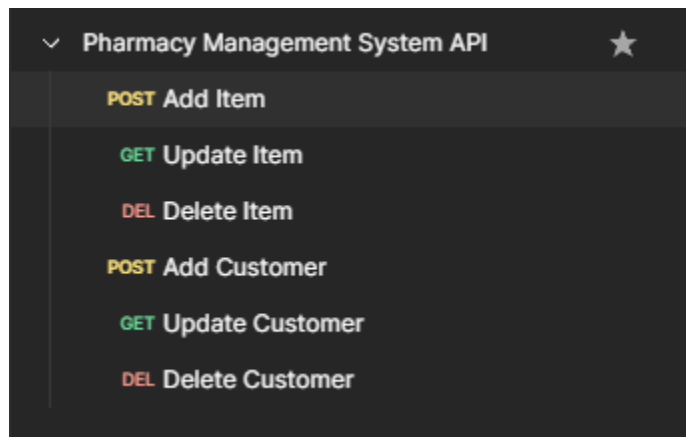

Importing the Collection

To import the Postman request collection, follow these steps:

1. Open Postman.
2. Click on the "Import" button in the top-left corner.
3. Select the option to "Import From Link".
4. Paste the link to the collection JSON file and click "Import".
